BUILDING A MORE
SUSTAINABLE
FUTURE

LETTER FROM THE Chief Executive Officer

Colleagues and Friends,

We've built our core reputation on developing great ideas and products that solve problems for customers around the world. How? With smart strategy and a dedicated focus. We bring the same level of dedication to being a responsible corporate citizen, solving community problems along the way.

We've compiled this report to share our work with you and highlight the actions that are making a difference. We're building stronger communities, protecting the health and safety of our people, safeguarding the environment, and upholding high standards in everything we do.

Our three focus areas include:

- **Strong, stable, vibrant communities.** We support a diverse group of organizations, groups and interests, making the communities we touch better places to live and work.
- **Safeguarding our environment and our employees.** We're leading the industry in reducing operational intensity as well as consumption of energy and natural resources as we adapt to a changing world.
- **Enhancing Textron's reputation.** We conduct every aspect of our business with integrity and in full compliance with all applicable laws. That's how we continue to earn high marks and a stellar reputation, which is one of our most valuable assets. It reflects our values of acting ethically and responsibly with everyone – our employees, suppliers and customers.

Even though we've achieved many things, our goal is to continue to improve in these three key areas. Because good business, good citizenship, and good stewardship go hand in hand.

Scott C. Donnelly

Chairman and Chief Executive Officer

Organizational Profile

As a pioneer of the diversified business model, Textron Inc. has evolved into a network of well-known multi-industry businesses serving a diverse and global customer base. With a rich history that began in 1923, we are equally excited about the future. The company leverages its global network of aircraft, defense and intelligence, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands* such as:

- Bell Helicopter
- Beechcraft
- Cessna
- E-Z-GO
- Greenlee
- Jacobsen
- Kautex
- Lycoming
- Textron Financial Corporation
- Textron Systems

With 2014 total revenues of \$13.8 billion, Textron (NYSE:TXT) is publicly held and ranked 228 on the FORTUNE 500 list of the largest U.S. companies. Headquartered in Providence, Rhode Island, USA, we have approximately 34,000 employees worldwide.

Day to day operations are led by each subsidiary and operating division, while oversight, direction and assistance is provided by Textron's Corporate Office consistent with sound corporate governance practices.

For more details about our structure, governance, leadership and financial performance, please refer to Textron.com and the [Textron 2014 Fact Book](#).

Textron Inc. is one of the world's best-known multi-industry companies and a pioneer of the diversified business model.

*To be consistent with the 2014 Fact Book and Annual Report, brands acquired in 2015 are not listed.

Commitment and Engagement

Committed Above and Beyond

Textron fosters a culture of continued improvement everywhere we go no matter the challenges we face. We are committed for the long haul: to contributing to the communities where our employees live and work; to guarding their health and safety; and to protecting the environments we impact. It's what leaders do. For specifics, see our:

- Code of Ethics (see page 18)
- Charitable Giving (see page 6)
- Environmental Health and Safety (see page 10)

Engaging with Stakeholders

Textron is engaged on many fronts. Our stakeholders include not just shareholders, but employees, customers, suppliers, government agencies and more. Engaging them means maintaining an on-going dialog, updating them as progress and events unfold on a regular basis. In 2014, we consistently involved stakeholders who are key to our focus areas.

To help them stay informed of our actions and solicit their input for improvement, we kept in touch through a range of channels and contact formats.

EMPLOYEES

- Continuous performance discussions
- Ethics and compliance reporting program and help line
- Corporate and business-level print and electronic communication

CUSTOMERS

- Voice-of-the-customer product development surveys and interviews
- Customer satisfaction
- Military audits/tours of Textron facilities and maintenance operations

CERTIFICATION AND REGULATORY AGENCIES

- ISO and OHSAS certification inspections of Textron sites
- Adherence to Greenhouse Gas Protocols of the World Business Council for Sustainable Development and the World Resource Institute
- Partnership with the U.S. Department of Energy's Better Plants program; recognized as a designated LEADER company
- Participant in the Carbon Disclosure Project

SUPPLIERS

- Workshops and documentation to align and collaborate workstreams
- Audits of supplier sites and operations

ASSOCIATIONS AND NON-GOVERNMENTAL ORGANIZATIONS

- Board member and employee participation in non-governmental organizations and trade associations

LOCAL COMMUNITIES AND CIVIC ORGANIZATIONS

Please see the next section for more information about the Textron Charitable Trust.

Economic Stewardship

Charitable Giving

Making a positive impact on the local communities around the globe where we do business is an important pillar of our corporate mission. We fulfill that role by supporting organizations that share our concerns through active volunteerism, philanthropic giving, and our non-profit Textron Charitable Trust.

In 2014, we gave more than \$4.6 million to begin solving the big issues that matter to us. These can be categorized into two major topics: Workforce Development and Education, and Healthy Families/Vibrant Communities.

Of our total giving, 35% supported Healthy Families/Vibrant Communities; and 31% supported Workforce Development & Education. In addition, 19% of our giving supported our Matching Gifts program to support the issues our employees are concerned about, and 15% supported United Way.

Workforce Development & Education

These are the programs that provide educational experiences for people of all ages and socioeconomic backgrounds. They are also important to develop the world's future workforce. In addition, they support our corporate values of integrity, trust, respect and pursuit of excellence. They include:

- Job training and employment development
- Enrichment and mentoring programs for youth
- College/university assistance

Healthy Families/Vibrant Communities

The focus of these programs is to invest in the quality of life in the communities where we do business. A wide range of organizations fit this description and we support many different programs. They encompass:

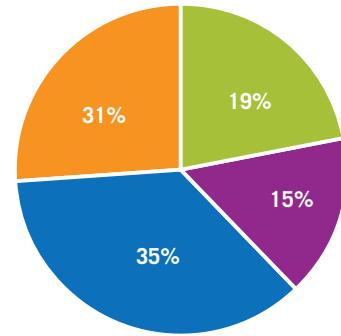

- Arts and culture
- Community revitalization
- Health and human services

2014 Textron Charitable Giving

2014 Textron Charitable Giving: \$4,644,081 in Total

Textron's total charitable giving comes from two sources: Textron Inc. and its business units, and the Textron Charitable Trust.

The Textron Charitable Trust is a private, nonprofit foundation sponsored by Textron Inc. The Trust provides philanthropic support for nonprofit agencies that focus on workforce development, education, arts and culture, community revitalization, and health and human service programs where Textron has a business presence.

Textron works diligently to build a **BETTER WORLDWIDE COMMUNITY** and be a **RESPONSIBLE CORPORATE CITIZEN**. As an active partner, we work alongside organizations that are **INNOVATIVE, RESPONSIBLE, and ETHICAL** in their response to human and environmental needs. It's a priority for each of us, one which we take seriously.

Environmental Health and Safety

At Textron we are focused on minimizing the environmental impacts of our business activities, while maintaining and enhancing employee well-being. Our expectation for Environmental Health and Safety (EHS) performance is simple – continuous improvement. We expect that our workplaces will be safer, our employees healthier and our impact on the environment lighter today than yesterday.

Textron manages EHS systematically. At the corporate level, our global EHS policies establish a framework which includes facility auditing, performance data reporting, minimum standards around EHS program elements, and quarterly meetings with Textron businesses to follow up on key issues. The businesses augment the corporate program with management systems of their own. For instance, Bell Helicopter uses the Du Pont safety management system, and Kautex facilities are ISO 14001 and ISO 18001 certified. The overall program is managed by the Textron EHS Council whose members include the senior EHS leaders from the Textron corporate office and, each Textron business unit. We use an annual goal setting process to drive environmental and injury rate reduction targets. The injury rate target (TRIR) is one of a few key performance metrics which reside at the highest level of the organization. Performance to these goals is tracked and reported to senior leadership as part of our Plan-Do-Check-Act process.

In this section, you will see many of the measures Textron uses to track its EHS progress, some are improved, and some are opportunities. In all cases, we will continue to work hard to achieve our ultimate vision of zero injuries and zero adverse environmental impact.

BUILDING A MORE SUSTAINABLE FUTURE

Environment First

Environmental performance is a key component of our facility operations. Our commitment to preventing adverse environmental impacts starts with compliance to regulatory and internal standards. Beyond compliance, we are focused on reducing the energy and natural resource intensity of our operations. In order to assess our environmental performance, we measure key environmental performance indicators. These include energy and fuel consumption, greenhouse gas emissions and waste disposal.

2014 marked the end of our first 5 year sustainability goal performance period. Our goal was to reduce energy use, greenhouse gas emissions and waste by 20% normalized to revenue. Performance data are shared on the following pages.

SAFETY

Each and every Textron employee shares an unquestioned commitment to minimizing the company's environmental impact and to conducting business in an environmentally sustainable manner using safe behaviors and best practices. Keeping each other **ACCOUNTABLE, SHOWING LEADERSHIP, AND FOSTERING AN ATMOSPHERE OF CONTINUOUS PROCESS IMPROVEMENT** moves us closer to our goals of zero injuries and illnesses; lessened environmental impact; and positive community impact.

BUILDING A MORE SUSTAINABLE FUTURE

ENERGY EFFICIENCY

In 2014, Textron consumed 4,762,000 million Btu (MM Btu) of energy to run its operations. Of this, electricity use accounted for 2,710,000 MMBtu (indirect energy). The remainder of our energy use consisted of natural gas, fuel oil and coke (direct energy). On an absolute basis, our energy consumption decreased by 1.0 % from 2013 and on an intensity basis energy use decreased by 4.4% over 2013. Over our five year goal period we achieved an energy intensity improvement of 16%. Despite making good progress we fell short of our 20% improvement target.

Improving Energy Efficiency

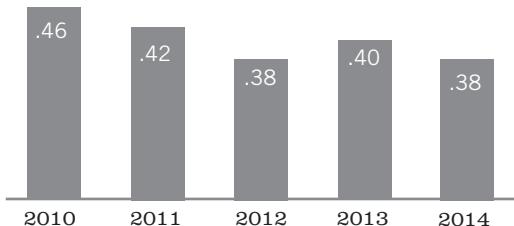

Reducing emissions and environmental footprint

Textron successfully employs Kaizen Events to improve energy efficiency and reduce waste. In 2014, through these events and other efforts across the company Textron completed over 100 projects which saved over 170,000 MMBtus in energy and reduced Greenhouse Gas emissions by over 15,000 metric tons. We also completed a number of waste reduction and water conservation projects which have contributed to reducing the footprint of our operations on the environment.

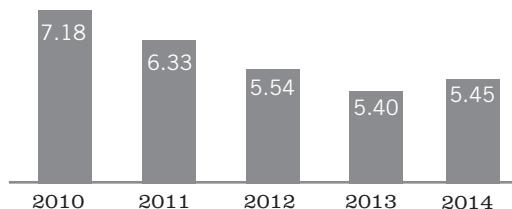

WASTE MINIMIZATION

In 2014, Textron operations disposed of 68.4 million pounds of waste, of which 5.5 million pounds were hazardous. This represents a 4.6% increase in waste disposal over 2013. On a normalized basis (pounds disposed/revenue), Textron's waste intensity declined by 1.0 % over 2013. Over our five year goal period we achieved a waste intensity improvement of 21%, exceeding our 20% improvement goal. In 2014 Textron recycling programs diverted 59.8 million pounds of materials from landfills, achieving a recycling rate of 46%.

Energy Intensity (MMBtu/Revenue)

Waste Intensity (Lbs/Revenue)

GREENHOUSE GAS EMISSIONS REDUCTION

Textron's methodology for measuring greenhouse gas (GHG) emissions follows the Greenhouse Gas Protocols of the World Business Council for Sustainable Development and the World Resource Institute. Consistent with these protocols, Textron measures emissions of the three principal GHGs covered by the Kyoto Protocol:

- Carbon Dioxide (CO₂)
- Methane (CH₄)
- Nitrous Oxide (N₂O)

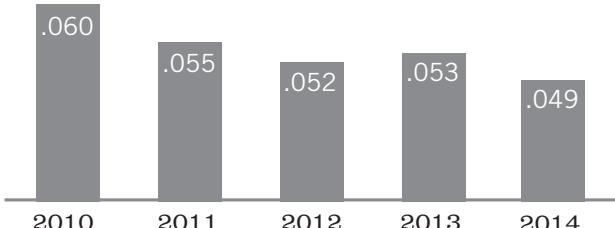

Emissions of the remaining greenhouse gases covered by the Kyoto Protocol are not significant for Textron. Textron accounts for direct and indirect GHG emissions in terms of CO₂-equivalents (CO₂-e). Direct GHG emissions are those that occur from stationary and mobile sources that Textron owns or controls. These emissions are also referred to as "Scope 1" emissions.

Indirect emissions, or "Scope 2" emissions, occur from sources that Textron does not own or control, mainly related to the use or purchase of electricity.

In 2014 Textron had 166,700 metric tons of direct and 454,000 metric tons of indirect GHG emissions. On an absolute basis, our total GHG emissions decreased by 2.4 % while our GHG intensity decreased by 6 % from 2013. Over our five year goal period we achieved a GHG intensity improvement of 17%, falling a little short of our ambitions of a 20% improvement target.

Going forward we intend to continue to work diligently to reduce our environmental footprint, applying what we learned from our first goal period, and improving our processes. As the next step in our sustainability journey and to maintain our momentum, Textron Business Units have set individual annual improvement targets focused on the performance measures most relevant to them. For 2015, these targets equate to between a 1% to 5% reduction in greenhouse gas emissions, energy use, waste disposal, and water use. We will detail our progress on these targets in subsequent reports.

GHG Intensity (CO₂-e/Revenue)

BUILDING A MORE
SUSTAINABLE
FUTURE

Employee Health and Wellness

Textron's Health and Wellness mission is to develop a culture that empowers employees and their families to adopt and maintain a healthy lifestyle. Our wellness core operating principles are:

- Healthy, empowered employees, are safer and more productive
- A healthy workplace promotes healthy lifestyles at home.

Textron offers a wide range of disease management and wellness services for employees and their families in an effort to help them improve their health and wellness. The company, as well as our vendors, continually solicits feedback to improve service delivery with the goal of helping employees and families achieve a healthy lifestyle.

The Textron Wellness mission is aligned around three major areas of wellness:

- Nutrition
- Physical Activity
- Smoking Cessation

Textron and its business units continue to develop wellness activities in these three areas including:

■ Nutrition

- Offering employee-specific nutrition communications
- Providing more nutritious foods and drinks in vending machines, cafeterias and in meetings
- Implementing nutrition guidelines to assist our operations with managing vending, cafeterias and meeting catering. By providing guidelines based on national standards Textron operations are directing wellness resources to align more closely with national and international government communications and nutrition strategies.

■ Physical Activity

- Offering enterprise discount contracts for physical activity tracking devices
- Encouraging enterprise contracts for physical activity tracking programs
- Developing walking trails outside and inside of operations at business units

■ Smoking Cessation

- Offering free smoking cessation programs

BUILDING A MORE
SUSTAINABLE
FUTURE

PURSUIT OF EXCELLENCE

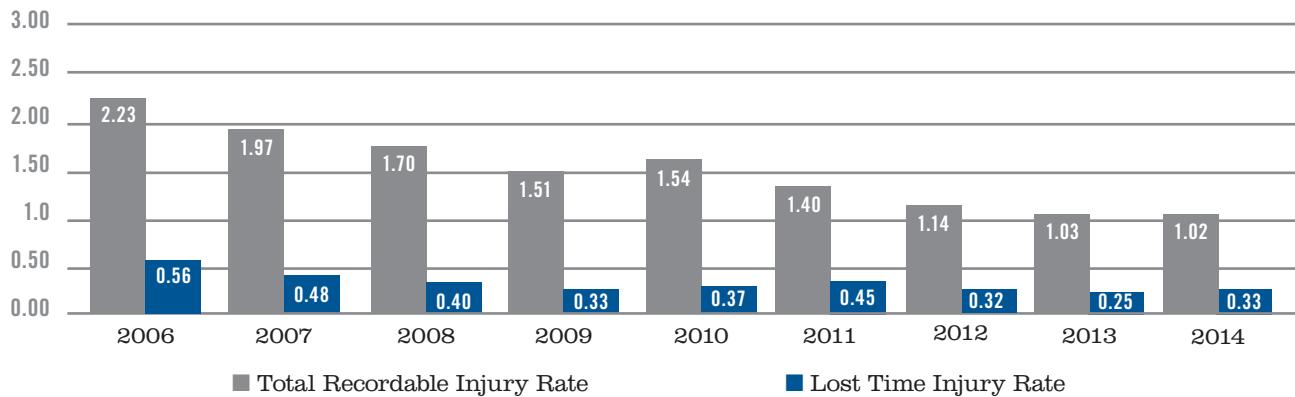

Protecting Our Employees

Textron uses a number of metrics to evaluate health and safety performance globally. The United States Department of Labor Occupational Safety & Health Administration (OSHA) recordkeeping rules are the guidelines all Textron facilities use for reporting injuries.

- **Total Recordable Injury Rate (TRIR)** measures the number of injuries per 100 workers. In 2014, Textron achieved a TRIR of 1.02, and 96 Textron facilities had no recordable injuries.
- **Lost Time Injury Rate (LTIR)** tracks the number of injuries per 100 workers with one day or more away from work. Textron's 2014 LTIR was 0.33, and 130 Textron facilities had no lost time injuries.

Textron Injury Rates 2006–2014

People

A large part of our success has always been our people. That's because we cultivate a dynamic work environment and a culture in which each person feels valued, respected and challenged. Diversity contributes to our success as well – it stimulates creativity and innovation and helps the company grow. We continue to be committed to developing talent, hiring and keeping the best and brightest, and ensuring we make the best use of each employee's talent and skill.

Developing Talent

All our business units are dedicated to providing growth opportunities. Matching talent with objectives is the surest path to enterprise-wide success, and we have four focus areas to help us achieve that goal.

- Attract & Retain – We nurture current and future talent, by hiring strategically, providing challenging and rewarding assignments, and hiring/promoting from within.
- Manage & Motivate – We are dedicated to communicating performance expectations clearly and rewarding outstanding results-oriented performance.
- Build Capabilities – We help employees develop the skills, knowledge and experience they need to succeed personally as well as to expand Textron's success.
- Develop Careers and Talent – We help employees evolve their careers through enterprise-wide succession planning and improving movement between business units.

RESPECT

Textron thrives on an environment of **TEAMWORK** and **TRUST** as well as **ETHICS** and **INTEGRITY**, where employees can advance personally and professionally while **MAKING A REAL IMPACT** on our common goals.

Diversity is in Our DNA

At Textron, diversity is embraced – among employees, ideas and styles. We enthusiastically support Employee Network Groups (ENGs) to engage the cultures, communities, and lives of all our employees. These groups offer opportunities for professional growth and development as well as shared communication and ideas. They also add to Textron's standing as a global leader. Our 2014 ENGs* include:

Bell Helicopter

- Asian Employees Association (AEA)
- Bell African Ancestry Network Group (BAANG)
- Bell Helicopter's Veteran Association (VORTEX)
- LA VIDA (Latin Association for Values, Interaction, Development, and Assistance)
- PROfessionals for the Development and Integration of Generation Y employees (PRODIGY)
- Women's Leadership Forum (WLF)

Textron Aviation

- Leadership Education and Development Association (LEAD)
- Plane Talk Toastmasters
- Flying Club
- Flyers Cycling Group
- Women's Informal Network Group (WING)

Textron Systems

- Green Team
- New Hires Activity Group
- The Women's Network
- Systems Harnessing Inclusiveness, Excellence & Leadership Development (SHIELD)
- Diversity Committee at Lycoming

Textron Corporate

- Women's Leadership Forum
- Textron Face-to-Face
- Toastmasters

Textron Tools & Test

- Textron Tools & Test Young Professionals (T3YP)

Jacobsen

- PROfessionals for Development In Generation Y (PRODIGY)
- Ladies of Jake

CREATING TOMORROW'S LEADERS

The Leadership Development Program is a key component of our talent development strategy. As baby boomers begin to retire and millennials become the largest workforce demographic, our strategy of growing talent and promoting from within will be even more crucial.

Motivated and high-potential entry level college graduates are invited to join the Leadership Development Program. During this 2-3 year program, participants rotate through a series of challenging roles, and assignments around the world and in multiple businesses. The program includes training in engineering, integrated supply chain, information technology, finance, human resources, communications and marketing. A dedicated team at Textron Corporate collaborates with business unit leaders to develop program participants by offering them rich and rewarding experiences.

* ENGs are local to our business units, which is why you'll see more than one women's network, for example.

BUILDING A MORE SUSTAINABLE FUTURE

Ethics & Compliance

We know we must earn the trust and respect of all our stakeholders: customers, shareholders, employees, and the communities where we live and work. That's why we take ethics and compliance very seriously, adhering to a strict standard of conduct at Textron and all of its business units.

Our values – integrity, respect, trust and the pursuit of excellence – are the pillars on which we build ethical behavior in all interactions. To safeguard against wrongdoing, we seek to prevent, detect and correct non-compliant behavior. Those who do not comply with Textron's Business Conduct Guidelines are subject to disciplinary action, up to and including termination of employment.

To stay on the right path, Textron's Ethics and Compliance Program reinforces ethical and compliant behavior. We rely on our Ethics and Compliance Program to help prevent illegal or unethical behavior through enterprise compliance policies and a variety of rigorous processes, including risk assessments, risk mitigation, monitoring and education. Active for more than 30 years, our program evolves with changes in business and in regulations.

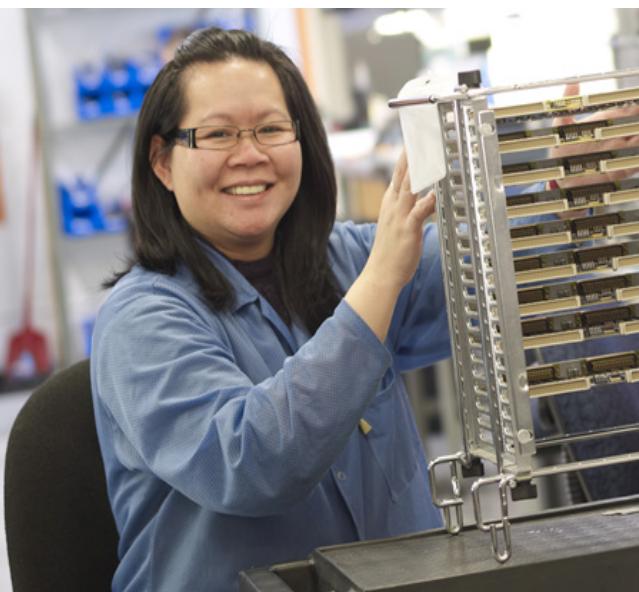

Annually, each operation must prepare a risk-based Ethics and Compliance Action Plan which includes goals for risk mitigation, training and related compliance activities. Each business unit's Ethics and Compliance Action Plan addresses compliance with existing legal regulations and Textron's compliance policies.

Performance checks to ensure we are on the right course include compliance audits and reviews, and scrutiny of Helpline activity. In addition, our corporate culture fosters self-reporting and acceptance of personal responsibility. Employees have multiple avenues through which they can ask questions, raise concerns or report violations without fear of retaliation, thus allowing us to review their claims and address concerns, as appropriate.

All new employees are asked to acknowledge receipt of Textron's Business Conduct Guidelines. Compliance training and awareness are an integral and ongoing part of Textron's Ethics and Compliance Program. Whenever possible, in-person ethics and compliance training is offered to employees at Textron's locations throughout the world. To supplement live training, online training is required. In 2014, employees completed more than 100,000 online compliance training modules. Textron also administers annual employee certifications for both its Business Conduct Guidelines and its Global Anti-Corruption Compliance policy.

TRUST

 **Values of TRUST, FAIRNESS, HONESTY and INTEGRITY** guide the actions of Textron employees throughout the world. We conduct Textron's business and our decision-making in accordance with **HIGH ETHICAL STANDARDS** and **STRICT ADHERENCE** to the laws and regulations of our host countries.
